

PLANTILLA PARA LA REALIZACIÓN DE LABERINTOS PERSONALIZADOS

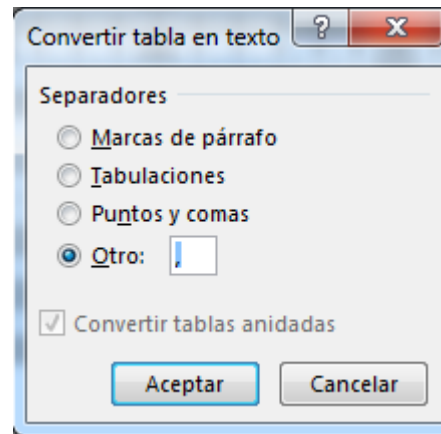

INSTRUCCIONES PARA LA REALIZACIÓN DEL LABERINTO

1. Deja en blanca las zonas que puedan ser transitadas y colorea del color que prefieras aquellos recuadros que representen paredes. Recuerda que en uno de los laterales debes dejar tres casillas sin colorear para indicar la entrada al laberinto y en otro otras tres casillas sin color que representen la salida. La plantilla quedará como en la del ejemplo que ves a continuación.

3. Podemos colocar objetos en el laberinto, concretamente esferas y cubos. Si quieres que tu laberinto tenga este tipo de elementos solo tendrás que colocar un 2 en aquellos sitios donde quieras que aparezca un cubo y un 3 en aquellos otros donde quieres que se muestre una esfera. Fíjate en la tabla de ejemplo.

4. Selecciona la tabla y en Microsoft Word ve a la pestaña **PRESENTACIÓN** → **CONVERTIR TEXTO A**. Aparecerá un cuadro similar al siguiente:

5. Selecciona **Otros** y en el cuadro asegúrate de que aparezca una coma. Tras hacer clic en **Aceptar** debes ver que la tabla se transforma en 40 filas con 40 elementos tal y como se muestran a continuación.

6. Copia todas las líneas, pégalas en el bloc de notas (asegúrate que no aparece al final ninguna fila en blanco) y guarda el fichero con el formato txt. A partir de este momento ya tienes un nuevo laberinto para empezar a jugar.

**¡COMIENZA YA A GENERAR TUS PROPIOS LABERINTOS Y DISFRUTA
DEL JUEGO!**
